Prince Sandhu . Jarvis Consulting

I have graduated with a Bachelor's in Software Engineering from McMaster University in 2019. I am currently employed by Jarvis Consulting Group in pursuit of extensively expanding my software application skills through working on various exciting projects by utilizing current and in-demand technologies and frameworks. My prior industry experience includes a one-year internship at the Ontario Ministry of Children, Community and Social Services. I supported the System Development & Maintenance team in planning, developing, implementing, and testing the Child Protection Information Network (CPIN) application, along with providing tier-2 support for onboarding regional agencies. I particularly enjoy tackling new challenges regularly and the dynamic nature of the profession is what excites me and is precisely the reason why I chose to pursue a career in the software development industry.

Skills

Proficient: Java, Algorithms & Data Structures, Linux/Bash, Agile/Scrum, Git

Competent: C, JavaScript, RDBMS/SQL, HTML/CSS, React Native, LaTeX

Familiar: TypeScript, React, Python, JUnit, MATLAB, UML

Professional Experiences

Software Developer, Jarvis (December 2021-present): Exercised agile methodologies on a daily basis in a team environment to design and implement numerous software projects using a vide variety of technologies such as Linux, PostgreSQL, Docker, and Git.

Junior Application Developer, Ontario Ministry of Children, Community, and Social Services (September 2017-September 2018): Supported the System Development & Maintenance team in planning, developing, implementing, and testing the Child Protection Information Network application. Documented and tracked testing defects, debugged, and troubleshot to ensure new requirements are implemented while existing functionality is not compromised.

Education

McMaster University (2014-2019), Bachelor of Engineering, Software Engineering - Dean's List (2017,2019) - GPA: 3.5/4.0
